Anyan's comments:
B-52 is one of the oldest standing students of the series -_-;;;

The second episode is a pediatrics episode after such a long time... PAK-FA and the F-35 had accidents coincidentally it a similar timeframe.

the last two episode were about the Sentinel that crash landed in Iran. It was unsure to the public whether or not it was true...

But later Uncle Sam officially told Iran to give it back so the Sentinel on display in Iran is apparently real.
